Patient Mover Rescue Chair

Product tested to 400lbs Max Load

The Patient Mover Rescue Chair is a lightweight and compact chair stretcher used to transport patients through narrow hallways, up and down stairs and from confined spaces.

The Rescue Chair is fluid impervious, disposable and easily folds up to be stored in a rescue bag. Made from a heavy duty non-woven material, the Rescue Chair is able to handle heavy loads and features 8 handles to allow for extra handlers while carrying larger patients.
